FINAL CALL FOR CONTRIBUTIONS

Fifth International i* Workshop (iStar'11) Trento, Italy, 29-30 August,
2011

http://www.cin.ufpe.br/~istar11/

Co-located with the 19th IEEE International Requirements Engineering
Conference (RE'11)

A growing number of groups around the world have been using the i*
modellingframework in their research on early requirements engineering, business

process design, organization modelling, software development methodologies,
and more. Following successful workshops in Trento (2002), London (2005),
Recife (2008) and Hammamet (2010), it is time for another meeting focusing

on i*, Tropos, and related frameworks, where researchers can exchange
ideas, compare notes, and hopefully forge new collaboration with like-minded folk.

We are organizing the Fifth International i* Workshop, and cordially invite

you and members of your group to join us. The 2-day workshop will be
held in Trento, Italy, 29-30 August, 2011, as a co-located event with the 19th IEEE
International Requirements Engineering Conference (RE'11). This year, the

workshop is including a Tools Fair, see description at the end of this
message.

This research workshop complements the iStar Showcase'11 event being
organized for 21 June, 2011 in London UK, aimed at promoting industry

awareness and adoption. You may find timely information about this event
at http://istar.rwth-aachen.de/tiki-view_articles.php and

http://www.city.ac.uk/informatics/school-organisation/centre-for-human-computer-interaction-design/istar11.

FORMAT:

The objective of the workshop is to share knowledge, stimulate discussion
and foster new lines of research and collaboration among different groups.

To support these goals, we will schedule as much time for discussion as for

presentations – the actual time will depend on the final number of accepted
papers. For every accepted paper, we will assign one discussant that will
provide an initial position about the paper once presented, and then

discussion will follow. If the schedule allows, we plan to include further

occasions for discussion in the program, in addition to the customary
wrap-up session.

The program will also include a keynote talk.

PAPER SUBMISSIONS

Contributions should be 4-6 pages in LNCS format,
http://www.springer.de/comp/lncs/authors.html, describing current and

ongoing research related the i* framework. The contribution shall adhere to
the following structure:
- Title, authors, abstract
- Section 1. Introduction.
- Section 2. Objectives of the research.
- Section 3. Scientific contributions. If you have tool support, please

mention and describe it explicitly
- Section 4. Conclusions. Of particular interest are any assessments of i*
and related frameworks, including industrial experiences
- Section 5. Ongoing and future work
- References. Please restrict references to mainly your own work.

All submissions should be uploaded to easychair
https://www.easychair.org/conferences/?conf=istar11

All submissions will be peer-reviewed and accepted works will be published

in the CEUR Workshop Proceedings Series,
http://sunsite.informatik.rwth-aachen.de/Publications/CEUR-WS/.

IMPORTANT DATES

June 3rd, 2011 --- Submit title, abstract and paper
July 11th, 2011 --- Notification
July 21st, 2011 --- Camera Ready
August 29th-30th, 2011 --- iStar 2011 in Trento, Italy

WORKSHOP ORGANIZERS

Jaelson Castro Universidade Federal de Pernambuco, Brazil
Xavier Franch Universitat Politècnica de Catalunya, Spain
John Mylopoulos University of Trento, Italy
Eric Yu University of Toronto, Canada

Submissions management:

Carla Silva, Universidade Federal da Paraiba, Brazil

For further questions contact carla@dce.ufpb.br
(Subject : iStar'11 Paper Submission)

i* Workshop TOOLS FAIR: Call for Submissions

Many tools have been created to facilitate modeling and analysis with i*
and
related frameworks. As part of the 5th International i* Workshop (iStar'11)

we are organizing a Tools Fair to update community knowledge about the
current offerings of i* modeling and reasoning tools.

FORMAT

The i* Workshop will include a session for tool demos. The session will

consist of a two-minute presentation of two slides (automatic transition
from one slide to the next will be enforced) and then the floor will be
opened for demos.

TOOL SUBMISSIONS

Fill out a form providing information about your tool by creating a wiki

page on the i* wiki:
http://istar.rwth-aachen.de/tiki-index.php?page=i*+Tools. If a page on the
wiki already exists for your tool, please update it as appropriate. Contact

jenhork@cs.utoronto.ca if you require a new user name and password for the
wiki. The consolidation of these forms will be used to update our online

comparison of i* Tools
(http://istar.rwth-aachen.de/tiki-index.php?page=Comparing+the+i*+Tools)

Prepare a three page description of the tool, using LNCS format
http://www.springer.de/comp/lncs/authors.html. Descriptions should include

a screen shot of the tool and should cover the following points:
• Tool name and version
• Download information/availability
• Web page and documentation
• Goal modeling framework supported
• Main purpose of the tool

• Primary features
• Status and maturity
• Limitations and future plans

• Interoperability with other tools
• Use in industrial case studies (if applicable)

All descriptions should be uploaded to easychair

https://www.easychair.org/conferences/?conf=istar11

The Tools Fair proceedings will be peer-reviewed and published in the CEUR

Workshop Proceedings Series,
http://sunsite.informatik.rwth-aachen.de/Publications/CEUR-WS/, as part of
the iStar workshop proceedings

IMPORTANT DATES

June 3rd, 2011 --- Submit tool form and description
July 11th, 2011 --- Notification
July 21st, 2011 --- Camera Ready
August 29th-30th, 2011 --- iStar Tools Fair 2011 in Trento, Italy

TOOLS FAIR ORGANIZER

Jennifer Horkoff, University of Toronto, Canada
For further questions contact jenhork@cs.utoronto.ca
(Subject : iStar'11 Tools Fair).
