iStar 2019 12th International *i** Workshop Salvador, Brazil November 4th, 2019

Topics of interests include, but are not limited to:

- Adaptive requirements-driven systems
- Agent-oriented systems development
- Business intelligence and data analytics
- Business modeling
- · Business process analysis and design, re engineering
- Business, service, and software ecosystems
- Enterprise, systems, and organizational architecture
- Evaluation, verification and validation
- Experience reports and case studies
- Evolution, adaptation, and system dynamics
- Formalizing or extending iStar 2.0
- *i** modeling techniques and metamodels
- Knowledge management
- · Law and regulatory compliance
- Mobile and cloud requirements engineering
- · Model analysis and contextual reasoning
- Networking or integration with other modeling languages or techniques
- Novel applications of i*
- Ontological foundations
- Requirements engineering
- · Scalability and uncertainty in modeling
- Security requirements engineering, privacy, and trust
- Socio-technical systems
- Software engineering processes and organizations
- Strategy modeling and business model innovation
- Tools, visualization, and interaction
- Variability and personalization

A growing number of groups around the world have been using goal modelling frameworks (such as *i** iStar) in their research on requirements engineering, business process design, organization modelling, software development methodologies, and more. This workshop is the ideal venue where researchers can exchange ideas, compare notes, and hopefully forge new collaboration with like-minded folk. Contributions on related frameworks, such as GRL, Tropos, and Techne, are welcome.

We cordially invite you and members of your group to join us at the Twelfth International *i** Workshop, which this year is part of the **38th International Conference on Conceptual Modeling (ER 2019)**.

EXTENDED DEADLINE!

Key dates

Paper submission: July 14th Authors' notification: August 4th Camera-ready submission: August 18th
